PROFESSIONAL EXPERIENCE

Hunstman Cancer Institute

Salt Lake City, UT

Database Administrator

Sep 2025 - Present

- Utilized Flyway and Gitlab CI/CD pipelines to manage database changes across development, staging, and production environments
- Engineered and deployed a comprehensive SQL Server monitoring suite (using PowerShell and DbDash) where no formal monitoring previously existed, enabling proactive alerting and 24/7 visibility into server health.
- Established and executed critical maintenance protocols (index optimization, integrity checks, and statistics updates) during scheduled windows, significantly reducing fragmented data and improving query response times.
- Developed Docker-based testing environments to allow developers to validate database changes locally, accelerating the development lifecycle.

Rocket LLC

Remote

Database Engineer Intern

May 2025 - Aug 2025

- Implemented CI/CD pipelines and enforced automated tests for the Data Archiver project to improve deployment reliability
- Optimized SQL Server stored procedures, often increasing performance by 5x or more; advised Postgres indexing using pganalyze

Willis Towers Watson

Salt Lake City, UT

Database Engineer

Nov 2020 - May 2025

- Designed and optimized SQL Server schemas and implemented stored procedures, triggers, and functions to improve query performance by up to 300%
- Redesigned destination tables for the Log File Analysis ETL (C#, Azure Functions), resolving ingestion bottlenecks and increasing throughput by over 100%
- Owned the Loss of Funding process for two years: enabled customer teams to recover \$1.5M+ annually by refactoring legacy code, resolving production defects, and producing documentation and trainings to transfer ownership

EDUCATION

Western Governors University

Salt Lake City, UT

Bachelor of Science, Computer Science

2025

Utah Valley University

Orem, UT

Associate of Science

2020

TECHNICAL SKILLS

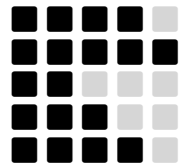

Python

SQL (T-SQL)

C#

ETL Pipelines (SSIS)

Agile

PERSONAL PROJECTS

- **House Price Prediction: (click me!)** House Price Prediction — Python (Pandas, Scikit-learn, XGBoost) — data cleaning, ML training, and visualizations.
- **Parry God:** 48-hour game jam — Godot (GDScript) — complete game built in Godot under tight deadline with one partner.

PORTFOLIO

- **YouTube:** youtube.com/playlist
- **GitHub:** github.com/BenjaBelnap

TOOLS & CERTIFICATIONS

- **Tools:** Visual Studio, Copilot, GitHub, Docker, SSMS, Excel, Jira
- **Certifications:** CompTIA Project+, ITIL 4 Foundations
